

SHENZHEN BODEN TECHNOLOGY DEVELOPMENT CO., LTD.

BD-05T067L Wire Connection Instructions

			
1	PWM speed control wire	Blue	10-30KHz; 10-100% (100% = 0 rpm / 0-10% = max rpm); Low: min 0V / max. 0.5V High: min. 2V / max. 5.5V
2	GND Power Negative	Black	Ground
3	FG RPM feedback	Yellow	Output, signal current 2 mA 5 pulses / cycle Low: min. 0V / max. 0.5V High: min. 2V / max. 5.5V
4	VCC Power Positive	Red	12V/24V Based on purchasing requirements or labeled voltage.
5	Full-speed operation connection:	Red connected to the positive pole, black and blue wire connected to the negative pole, the yellow wire is not connected, you can run at full speed.
